

**To fill in the blanks that you have left in your essay:**

**The title of a book needs to be italicized, i.e. *The Catcher in the Rye* by J.D. Salinger**

**The title of a web site needs to be in quotation marks, i.e. "Introduction"**

You might say:

In the "Introduction" of the online document entitled *Mental Health and Substance Abuse Facts and Figures Conquering Depression* by the World Health Organization it is stated that "In the last 50 years, rapid strides have been made in the treatment of depression".

### Parenthetical Documentation

When citing a source in your writing you must reference your list of Works Cited (what you just did above).

**For example:**

If you are using a direct quote from *Catcher in the Rye* (the same words as from the book) you must cite it as shown.

"I'd only been in two fights in my life, and I lost *both* of them" (Salinger 45-46).

OR

...as expressed in this quote from J.D. Salinger's *Catcher in the Rye*, "I'd only been in two fights in my life, and I lost *both* of them" (45-46).

Web sites are cited in the same manner. If there is no author listed you must use whatever comes first in the Works Cited citation.

**For example:**

"In the last 50 years, rapid strides have been made in the treatment of depression" (Introduction).
