Searching Other Library Catalogs in our Area

From our [Library homepage](#) click on [Internet Links](#), then [Libraries, Other](#).

Our library isn't always going to have what you need to complete your assignments. You may want to see what another library has on your topic of research. Choose a subject to search (using the same subject to search all three catalogs). What is your subject?

1. First go to **Santa Cruz Public Library web catalog**. Type in your topic. List one book or other resource (video, CD, etc.) including **title, type of resource, call number and if item is currently available to check out**.

2. Next go to **Cabrillo College web catalog**. Use the same topic as you did above. List one book or other resource (video, CD, etc.) including **title, type of resource, call number and if item is currently available to use in the library**.

3. Go to **UCSC's web catalog**. Use the same topic as you did above. List one book or other resource (video, CD, etc.) including **title, type of resource, call number and if item is currently available to use in the library**.

All the libraries listed above are open to the public to use. If you would like to check out materials you will need a library card from each library. In the case of Cabrillo College and UCSC you will need to pay for a yearly library card in order to check out materials.
