

# Information Literacy Kindergarten

## PRESEARCH

- What do we want to find out about? (topic and questions about it)
- What do we think we know? (brainstorm, mapping, recalling)

## SEARCH

- Where should we go to find out about our topic?
  - Field trip
  - Experts and class visitors
  - Library
    - Locate books, videos/dvds, read/listens, posters/pictures, realia, websites
- Which ones will best answer our questions?

## INTERPRET

- Did we find what we were looking for?
- What information will we use?
- Let's think, pair and share what we have learned.
- Let's put it all together (a "KWL" chart).

## APPLY

- How can we show/share what we've learned? (class-made book, pictures with dictation, posters, charts)

## EVALUATION

- Let's look at our KWL chart again (Were we able to answer our questions?)
- Could I/we teach someone else about this topic?

- Do we like the way we presented our topic? (How could we improve it next time?)
